Profile

Results-driven Software Developer with a solid background in full-stack development. Proficient in building dynamic, responsive web applications using modern JavaScript frameworks, RESTful APIs, and state management tools. Experienced in collaborating with cross-functional teams to design and implement scalable, maintainable solutions. Passionate about clean code, performance optimization, and delivering high-quality user experiences.

Professional Experience

Software Developer, Zibbey Consultancy 11/2024 – 08/2025

- Developed responsive and dynamic front-end interfaces using Vue.js and React.js, improving user experience and application performance.
- Built scalable and efficient backend services in Go (Golang), focusing on clean architecture, API development, and high-performance execution.
- Designed and optimized PostgreSQL databases, including writing complex queries, managing schema changes, and improving data retrieval efficiency.
- Deployed and managed applications on AWS
- Collaborated using GitHub for version control, handling pull requests, code reviews, branching strategies, and continuous integration practices.
- Enhanced cross-browser compatibility to deliver a consistent and reliable UI across all major browsers

Front End Developer, Exontric Systems 06/2023 – 01/2024

- Developed responsive, mobile-first user interfaces using semantic HTML, modern CSS, Bootstrap and vanilla JavaScript.
- Optimized page performance by reducing DOM operations, minimizing asset sizes, and improving loading behavior
- Collaborated with designers to convert Figma/UI mockups into pixel-perfect, production-ready web pages.
- Ensured cross-browser compatibility and consistent behavior across major desktop and mobile browsers.

Education

Master Of Computer Application, Dr. D Y Patil Agriculture and Technical University, Talsande. 2021 – 2023

Bachelor of Computer Application, Bharati Vidyapeeth, Kolhapur. 2018 – 2021

Skills

Front End

- Html, Css, Bootstrap, Vuetify, ReactJs, VueJs

Database and Version Control

- Mysql, Postgres, Github

Manual Testing

- SDLC And STLC Life Cycle
- Functional, Regression, Sanity, Smoke Testing
- Writing Test Cases And Re-test
- Defect Tracking Tool Like Jira

AI Tools

- Chatgpt
- Gemini
- Grok

Programming Language

- Javascript, Java, Go

Soft Skills

- Logic Building, Creative Design, Problem Solving

Cloud Tools

- Docker (Containerization, Dockerfile, Image Build & Optimization, Container Lifecycle)

Projects

Dynamic Form Builder

- Developed a **metadata-driven dynamic form builder** enabling users to design, preview, and manage complex form layouts without hardcoded UI.
- Implemented **section-based layouts**, configurable field sizes, and multiple modes (Create, Edit, View, Layout Edit) using **React + TypeScript**.
- Used **React Hook Form and Zod** for form state management, validation, and required field enforcement.
- Built **live preview, submission history, layout editing, and PDF export** with layout-accurate rendering.
- Architected the project using an **NX monorepo**, React Context, and reusable atomic components for scalability and maintainability.

Grocery Management System

- Create layout of grocery management system.
- Develop cart and billing flow using javascript.
- Uses dummy api for display data.
- Develop User-Freindly design flow using ReactJs

Certifications

- FullStack Java Development - Bitcode Technology
